

## **Disclaimer**

In the context of the coastMap initiative at the HZG, extensive data is collected, recorded, processed and analysed by the Institute of Coastal Research. The public is allowed free access to these maps, models and measurement data.

The copyright holders of the material are designated on the respective documents / data. They are responsible for their respective content.

The HZG as initiator of coastMap provides data from different fields of study on the coastMap site and strives for accuracy and timeliness of the information provided on the site. The possibility of errors and ambiguities cannot, however, be entirely excluded. HZG as initiator of coastMap therefore provides no guarantee for the timeliness, accuracy, comprehensiveness or quality of the documents and data offered.

The HZG is not liable nor can it provide any guarantee in regard to the data's suitability for a particular application, its timeliness, accuracy, comprehensiveness, quality or its continuous availability.

The HZG as an initiator is not responsible for damage resulting from the use or non-use of the information provided. It also accepts no responsibility for any damage resulting from computer viruses when accessing or downloading data or when installing or using software.

## **References and Links**

Direct or indirect references to third-party internet sites (links) on these pages have been provided by the operators to the best of their knowledge and by using the utmost care. The links merely provide access to third parties' internet sites.

The trustworthiness of third parties as well as the legality of "third-party content" on these third-party sites were considered of particular importance.

However, because Internet content is dynamic and can change at any time, constant individual checks of all content pertaining to a link is not always possible. The operator has no influence on linked websites and their "third-party content" and provides no guarantee for such content. The respective provider or operator of the site is solely responsible for the content on linked pages. The operator therefore does not explicitly adopt "third-party content" as its own. The respective provider or operator of the page referred to is solely liable for damages resulting from the use or non-use of "third-party content". In the event that the editorial team becomes aware of a legal rights breach, it will immediately remove such links.

Please communicate to us if you believe that the information or content of a link is incorrect, not up-to-date or is otherwise objectionable.

Adding links referencing the content of this website requires prior consent from this website's operator.

## **Usage conditions for utilising data and for publication of HZG's coastMap initiative data (as of June 2017):**

The following conditions apply to any data usage from the HZG's coastMap initiative. The user acknowledges data rights and agrees to the following guidelines:

- The data rights remain with the copyright holders and/or the project partners (see designation). No transfer of rights occurs by granting potential use.
- The use of data, maps and materials provided within the framework of the coastMap initiative is free of charge under the condition that the copyright holder and the copyright details are appropriately designated and the material is not commercially used.
- The principles of "good scientific practice" are to be observed.
  - In particular, source designation and citation requirements must be observed according to these specifications. This applies to all content, independent of the file format and usage.
  - Changing the provided data and/or materials is not permissible.
  - If the data provided by coastMap is an integral part of a publication, the copyright holder must be offered a co-authorship.
- If other third-party data are made available, the usage regulations of the third party must be observed.
